

Staff Epic: Manage and Moderate Posts

Epic Name: *Moderate Student Discussions*

Actor: *Staff Member (Moderator)*

Goal: Ensure the discussion board remains professional and relevant by reviewing, editing, or deleting inappropriate posts or replies.

Scenario

A staff member logs into the discussion system, navigates to the Post Dashboard, and inspects all recent posts made by users. The staff identifies an inappropriate or off-topic post and decides to delete it. Before deletion, the system prompts for confirmation. Upon confirmation, the post and its associated replies are removed from both the PostList and ReplyList. The dashboard refreshes to show the updated content list, confirming the action with a success message.

Inputs

- 1) Staff user credentials (for authentication)
- 2) Post ID or title of the targeted post
- 3) Confirmation action ("OK" or "Cancel" on delete dialog)

Actions

1. Staff logs in through the standard login screen.
2. System validates credentials and loads the staff home screen.
3. Staff navigates to the Post Dashboard and selects a post.
4. Clicks **Delete Selected Post**.
5. System displays a confirmation dialog asking: *"Delete this post?"*
6. If **OK** → The post is removed from **PostList**, and any associated replies are removed from **ReplyList**.

7. UI refreshes automatically using the `refreshPosts()` method.
8. If **Cancel**, the deletion is aborted and nothing changes.

Outputs

- Updated list of posts displayed on the dashboard.
- Success alert: *"Post deleted successfully."*
- If canceled: no change, the list remains as-is.

Why This Epic Matters

- Enables staff to **moderate inappropriate or off-topic content**, ensuring a healthy discussion environment.
- Demonstrates direct application of **CRUD (Delete)** functionality with proper **validation and confirmation dialogs**.
- Aligns with ethical moderation responsibilities for maintaining academic discourse.
