

User Stories for HW 2

Post CRUD User Stories

1 - As a user, I want to create a new post with a title and content so that I can share information

Acceptance Criteria: The Title and Content sections should not be empty, and when a new post is created, a success post must be made

2 - As a user, I want to be able to view every post so that I can see what everyone has shared

Acceptance Criteria: System displays a list of all posts in reverse chronological order

3 - As a user, I want to be able to delete a post created by me, allowing me to remove content I don't want

Acceptance Criteria: System must confirm deletion before deleting the post.

4 - As a user, I want to be able to update my post so I can correct or update its content

Acceptance Criteria: Only the creator can edit the post and empty fields are not allowed.

Reply CRUD User Stories

5 - As a user, I want to be able to reply to a post so I can participate in conversations

Acceptance Criteria: Replies cannot be empty; they must be stored and displayed under the correct post

6 - As a user, I want to view all replies under a post so that I can understand the “flow” of the discussion to follow it.

Acceptance Criteria: Replies must be displayed in chronological order right below the post.

7 - As a user, I want to be able to update my reply if there seems to be a mistake or if I need to add more info.

Acceptance Criteria: Only the author can do the update, and empty updates are not allowed

8 - As a user, I want to be able to delete my reply

Acceptance Criteria: The System must ask for confirmation before deletion

Validation

9 - As a user, I want the system to stop me from submitting empty fields so that posts and replies are “meaningful”

Acceptance Criteria: If any field is empty, an error message should show up, and nothing should be saved
